INTRODUCTION

Kryptogangsters was founded by a bad boy gone good. He is known and respected in many countries like the Netherlands, Spain, UAE, Morocco, Germany and Colombia. His work involved him being in touch with some of the biggest criminals in the world. But operating in a grey area became troubling and he decided to focus on finding a passion that would matter. Something that would make a difference for him, his loved ones and many other people around the world. While being incarcerated he got a push in the right direction and finally found his true passion; the crypto industry with the NFT market in particular.

Our Company

Not long after his release he started purchasing NFTs himself and at one point he figured that creating NFT's would be even more close to his passion. He knew that his past could be used as inspiration for a new project. That's when Kryptogangsters was born.

After gathering a team of professionals in different areas of expertise he then formed the company and started on his journey of becoming the first crypto company that combines NFT art, a cryptocurrency and a stablecoin in one solid structured economy. Forming the team started early in 2018 by joining forces with a crypto specialist. Together they started searching for creative designers who could design NFT's, programmers to develop a platform and website, more crypto specialists, community managers, and many more. Currently there are 15 people full time involved in Kryptogangsters.

Combining NFTs with a currency connecting a brand-new economy wasn't the initial idea but during development of the NFTs talks about combining it with a crypto currency became more and more part of the total operation. And at one point we couldn't see the NFT's apart from our currency and that's when we realised we found gold. All we needed was a good name for our cryptocurrency. With a focus on "gangsters", some of them known to distribute tons of narcotics, the choice to name our currency "Kilo" was an easy one. With 3 decimals

and "KG" as the symbol we know our currency will stand out just like our NFTs.

Lastly we decided to create a stablecoin backed by real and digital assets. Real Estate, Art, NFTs, Webshops and many more assets are already backing our soon to be released stablecoin which will serve as the bridge between our currency "Kilo" and the NFT's. Picking the name was easy again as we figured that the one true real world asset backing any currency is Gold. So our Stablecoin will be named Kilo Gold.

We hope you enjoyed the introduction and are eager to read more in the next pages about the project, the key art, the currency and the stablecoin.

KRYPTO GANGSTERS NFT

About the NFT's

We will launch 2 sets of collectible NFTs. One set are “cryptonised” versions of real world and fictional characters that in one way or another are known to be “gangsters”. Every NFT will be unique and only one per NFT will be available. The characters are designed by our team and all have unique attributes attached to them.

The second set of collectibles will be minted in one 10,000 NFT strong set of collectibles. These NFTs will be minted using an artificial intelligence process that will use and combine a set of attributes designed by our team.

10,000 Limited Edition NFT

The AI generated KryptoGangster NFT's will use a range of attributes per card. No NFT will be the same making the cards unique in their character. Every card is minted only once so owning one card makes the holder owner of a guaranteed unique card. The NFT's will be launched all at once on several platforms. Only 50 will be used for giveaways and marketing purposes.

Holders of the Kilo token will be informed through our VIP channel about the launch so they will be the first to have a chance to purchase the Kryptogangster NFT.

All NFT's will have a floor price of 0.08ETH

Our AI may use a combination of the following attributes to create the unique design (Attributes may vary on finalisation):

Head:

Bandana, Sephora, Cap, Hoody, Fisherman's hat, Balaclava, Joker Mask, Straw hat, Shtreimel

Hair:

Bald, Cornrows, Thin, Mohawk, Pony Tail, Mullet, Short hair, Emo hair, Curling hair, Rabbi Locks

Eyes:

Scar left eye, Scar Right eye, Tear tattoo right eye, Tear tattoo left eye, Tattoo forehead, Thick eyebrows, Thin eyebrows, Shavemark left eyebrow, Shavemark, right eyebrow, Sunshades, Glasses, Patch, Visor

Eyecolors:

Blue, Brown, Green, Grey, Black, Emerald green

Nose:

Piercing left, Piercing right Bull piercing , Piercing left & Right, No piercing, Piercing top of nose

Mouth:

Open, Closed
Grin, Toothless grin, Couple of gold teeth, Couple of diamond teeth, Partially broken teeth, Rotten teeth, Broken teeth, Missing teeth
Braces, Big diamond mouthpiece, Scars, Cigar, Joint

Facial hair:

Goatee, Full beard, Trimmed Smooth shaved, Dirty beard, Mustache

Neck:

Slit Throat Scar, Tattoo, Bowtie, Necktie, Rope
Chain, Necklace, Bandana, Tied sweater, Prison chain

Top torso:

Heavily tattooed Yakuza, Style, Muscles, Suit, Sweater
Hoodie, T-Shirt, Undershirt, Ripped shirt, Bullet wound, Knife wound

Attributes:

Glock, AK47, UZI, Tommy, Guns, Knife, Katana, Brass Knuckles, Mountains of coke Weed, Joints, Baseball Bat, Crowbar, Icepick, Mobile phone, Colt AR-15, Molotov Cocktail, Browning Automatic Rifle, Sawed-off Shotgun

KRYPTOGANGSTERS

NFT Cards

These cards will be unique in every matter as they will not be AI generated. In fact every single card is custom designed.

What makes these NFT's stand out is the fact that every card is based on a real or fictional character that is in someway or another associated with being a gangster. This can range from leaders of a drug cartel or someone who is known to manipulate markets for their own gain. Even known gangster-rappers will get their own NFT if they are part of our network.

Since we've already designed the first batch of these unique NFTs already we can present a first batch below:

Owning any Kryptogangster NFT will give you special privilege. The special ones will give you elite access to everything the Kryptogangster ecosystem has to offer. The limited edition AI generated NFTs will get you family access.

Elite access grants you rights like free NFTs, free stays in Villas, free cars, special discount with shops and websites, special tours in cities around the world, free access to our regularly organised MOB meetings and much more.

Family access give you discount on many things within the gangster ecosystem. Both NFT series will be partially minted on our website where the first 1000 adopters will get the chance to score and NFT.

Holders of our Kilo currency count as early adopters and are eligible to receive free NFTs on airdrop.

NFT Distribution

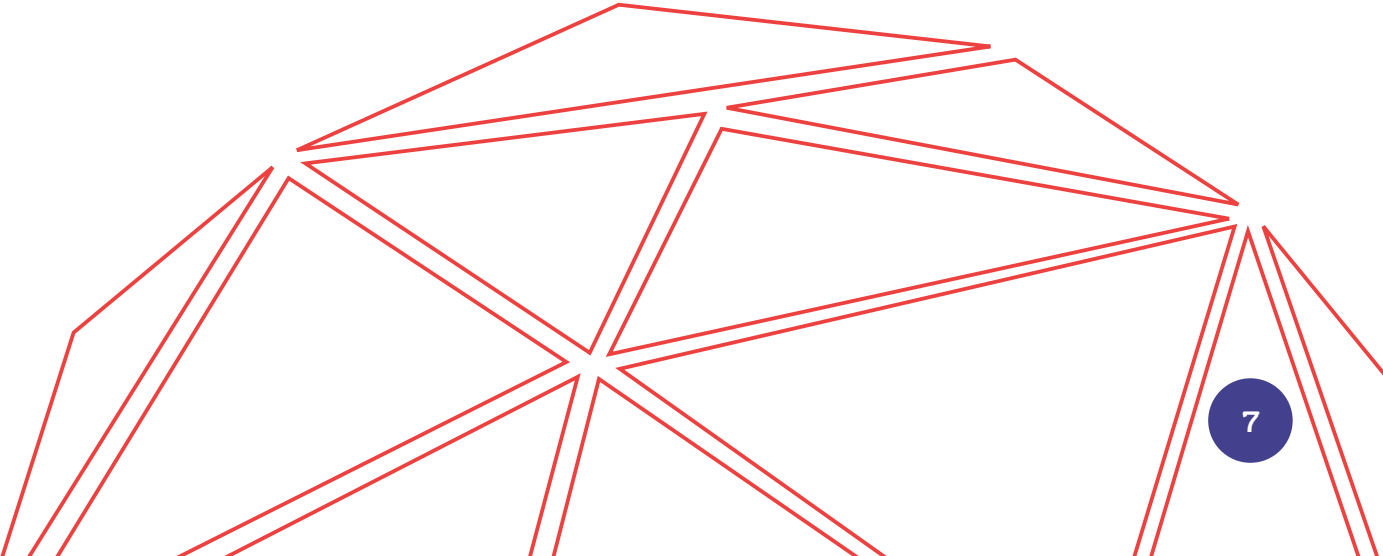

The 10K Limited Edition will be distributed as follows:

- 50 will be used as giveaways
- 50 will be used as airdrop
- 100 will be kept by the team for marketing purposes
- 1000 (1k) will be sold through our website marketplace
- 8800 (8.80k) will be made available through a NFT plat form like opensea or rarible.

The Uniquely designed KryptoGangsters will be minted ongoing per batch of 10. We expect to launch a new batch every month on different platforms.

Holders of Kilo get early bird privilege.

Cepre nonsed ma quam, quatur, voluptiis qui renis eatemporum voloratiant, quiandicia sini sit eum repudis doluptate ratem. Natia quo expeditatem imin nonse net qui aliquam. Ut que rem laborumet laborest et qui dolori ut.

NFT OWNERSHIP PERKS

Looking at the current NFT market owning an NFT itself is no guarantee that it will actually be worth anything after the initial minting phase. The value of any NFT is determined by several key factors that create actual value for said NFT.

Demand is very important and creates the biggest push towards the valuation of any NFT edition. Generally speaking a large community creates a lot of demand. To create a large community most NFT projects organise airdrops, giveaways and partnerships with other projects, websites, artists or create a digital “member-only” VIP place which is only accessible for holders of said NFTs.

We feel that the power of any NFT is the fact that it creates more possibilities for holders and projects than the ones offered at this moment alone. Therefore we have decided to add a royalty based ownership perk to the KryptoGangster NFTs that we will roll out once we have sold a certain amount of KryptoGangster NFTs.

Holders of the NFTs will get royalties from owning KryptoGangster NFTs. These royalties will be generated in real life by income through real life commercial activities coming from partnerships and collaborations. These activities will be announced during live events that will be held on a regular base.

You can learn more about this in our Discord or Telegram channel.

KILO TOKEN

As we see Kryptogangsters as the start of something much bigger than a regular NFT drop it speaks for itself that we combine it with a crypto currency. In this case we have chosen to build our currency on the Binance Smartchain (BSC) for a couple of reasons.

Speed – we believe the speed of the BSC is remarkable compared to the Ethereum chain. We want fast, nearly instant transactions for our currency so that users will be more inclined to use “Kilo” for their day to day business.

Low cost – the BSC stands out for their low transaction fees and combined with the high speed transactions it’s a no-brainer to choose a network like BSC for our currency.

Binance build – World’s biggest exchange is behind the BSC, hence the name “Binance Smartchain”. They keep updating their blockchain constantly and do whatever it takes to run a low cost high speed network.

We have full confidence in running our cost friendly, highspeed Kilo Currency on BSC and feel that users will appreciate the fact that we have chosen this path in the first place.

Naming the coin

Many currencies have names derived from their chain. Bitcoin, Ethereum and the likes being the most prominent examples. As our core business at the launch was building NFT’s we felt we needed to name the currency related to our product and not the business. Since our core business is building “Gangster” NFT we figured we should derive the name from their activities. And since most gangsters are known to traffic many kilo’s of contraband picking the name became easy. The Kilo was born.

Usage

The Kilo can be used as any normal token within the Smartchain Ecosystem. Sending and receiving is easy with wallets like Trust, MEW and Metamask.

Holders of the Kilo currency purchased during the private pre-sale or the token-sale get early bird access for our NFT’s, both the 10k limited edition and the KryptoGangsters. We will also use the holder addresses for NFT airdrops in the future.

To add demand to our currency we will also create a stablecoin backed by real world assets and NFT’s in our possession. Thus creating our own ecosystem where Kilo’s and the stablecoin go hand in hand with the NFT’s we create.

Supply

The total supply of the Kilo currency will be 250,000,000 (250 million) and can never be increased. Supply is set and already minted.

Kilo on the Smartchain:

<https://bscscan.com/token/0xa4fa1185c12ef7af0221d91494d36abbaefb3262>

Private Pre-sale

We have chosen to conduct two rounds of sales. The first one is the private pre-sale during which we will offer a total of 50,000,000 (50 Million) Kilo at a price of 0.01USD per Kilo to our private investors. We plan to reach 500k USD in sales through this private pre-sale which is our estimated softcap.

Token sale

The second round is our regular token sale which will be conducted on 2 different centralised exchanges. Names of the exchanges will be made public once we have finalised our Private Pre-Sale.

The amount of Kilo made available during the Token Sale will be 80,000,000 (80 Million) Kilo at a price of 0.02USD per Kilo. The sale will be conducted through the exchanges.

We opted to list on two exchanges for the following points:

An exchange usually requires a KYC process for listing any coin. At least the ones we target. Meaning that KryptoGangsters and the Kilo Currency get checked by an independent exchange. They will list us only if we successfully get screened. This is obviously positive for our investors now and for the potential holders in the future. Once we are screened by the exchange we show our investors and future holders that we are legitimate and safe to invest in.

Second; and exchange has the means to conduct a token sale on a much larger scale than we can do as a 15 man operation at this point. Besides; we are focussed on marketing ourselves as designers, creators and collectors. Conducting a large token sale is beyond our means and out of our league at this moment.

Projected Token Sale Target is 1,600,000 (1.6Million) USD. This will be divided into several pools like liquidity creation, marketing budget and operations.

TOKENOMICS

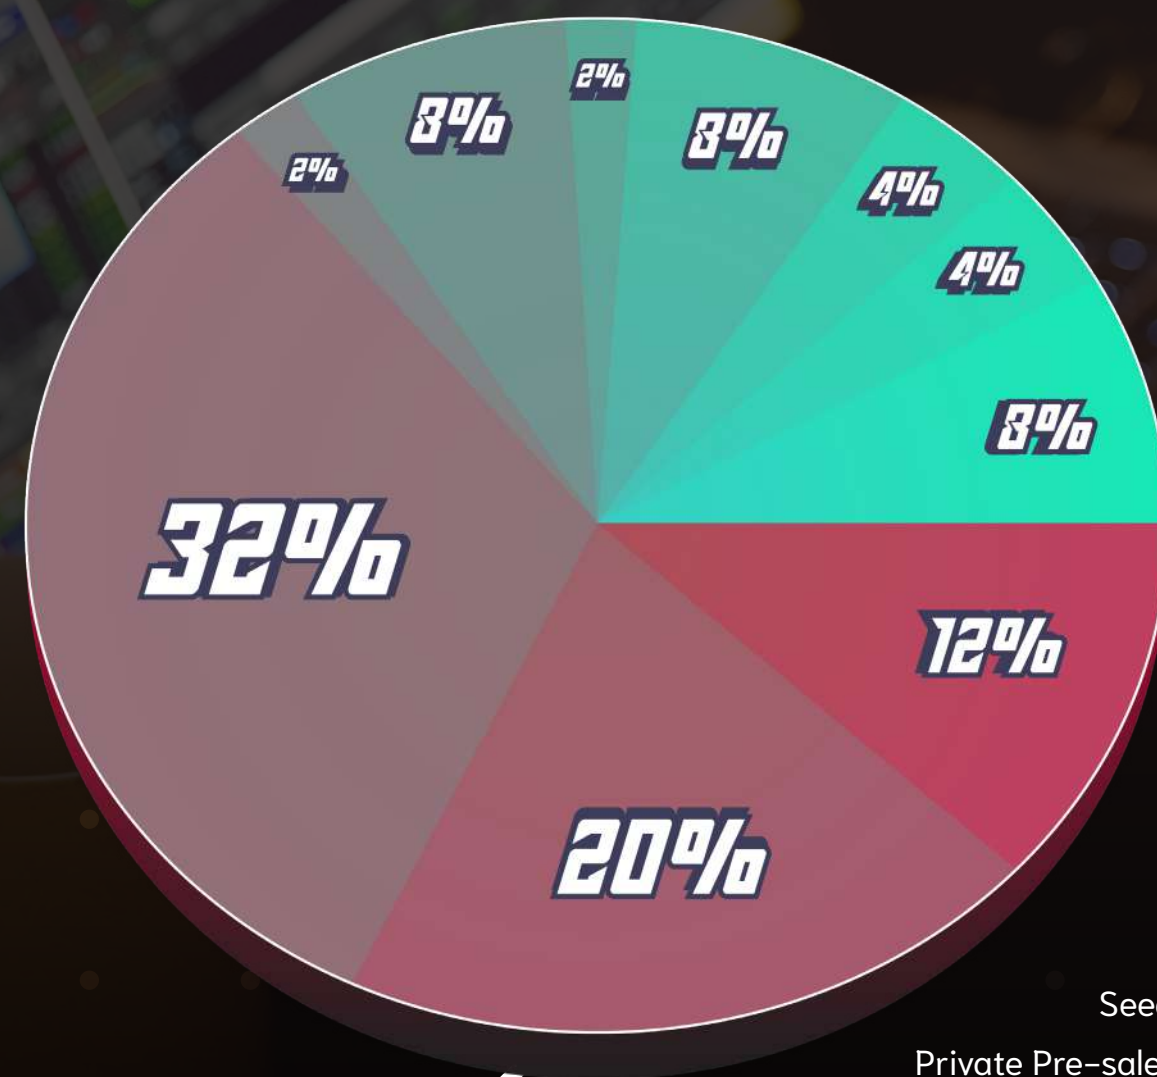

Name: Kilo

Symbol: KG

Decimals: 3

Smartchain BEP20 Token

Token distribution:

Seed (30M)

Private Pre-sale (50M)

Token Sale (80M)

Partners (5M)

Team (20M)

Community Incentive (5M)

Foundation (20M)

Marketing (10M)

Reserve (20M)

STABLE COIN

What is a Stablecoin?

A stablecoin is a new class of cryptocurrencies that attempts to offer price stability and are backed by a reserve asset. Stablecoins have gained traction as they attempt to offer the best of both worlds—the instant processing and security or privacy of payments of cryptocurrencies, and the volatility-free stable valuations of fiat currencies. (Source: Investopedia on Stablecoins)

Kryptogangsters Ecosystem

Our ecosystem involves the distribution of our NFTs and Kilo currency. Any currency that wants to become a **top100 CoinMarketCap** asset needs to have a couple of factors working for it.

First of all a good currency has a good amount of demand. And demand comes from use cases. What are the available within an ecosystem to create the need to hold and use the currency is the most legitimate question. A currency can have 1million holders but if these users have no reason whatsoever to either hold or use the currency the amount of holders becomes useless.

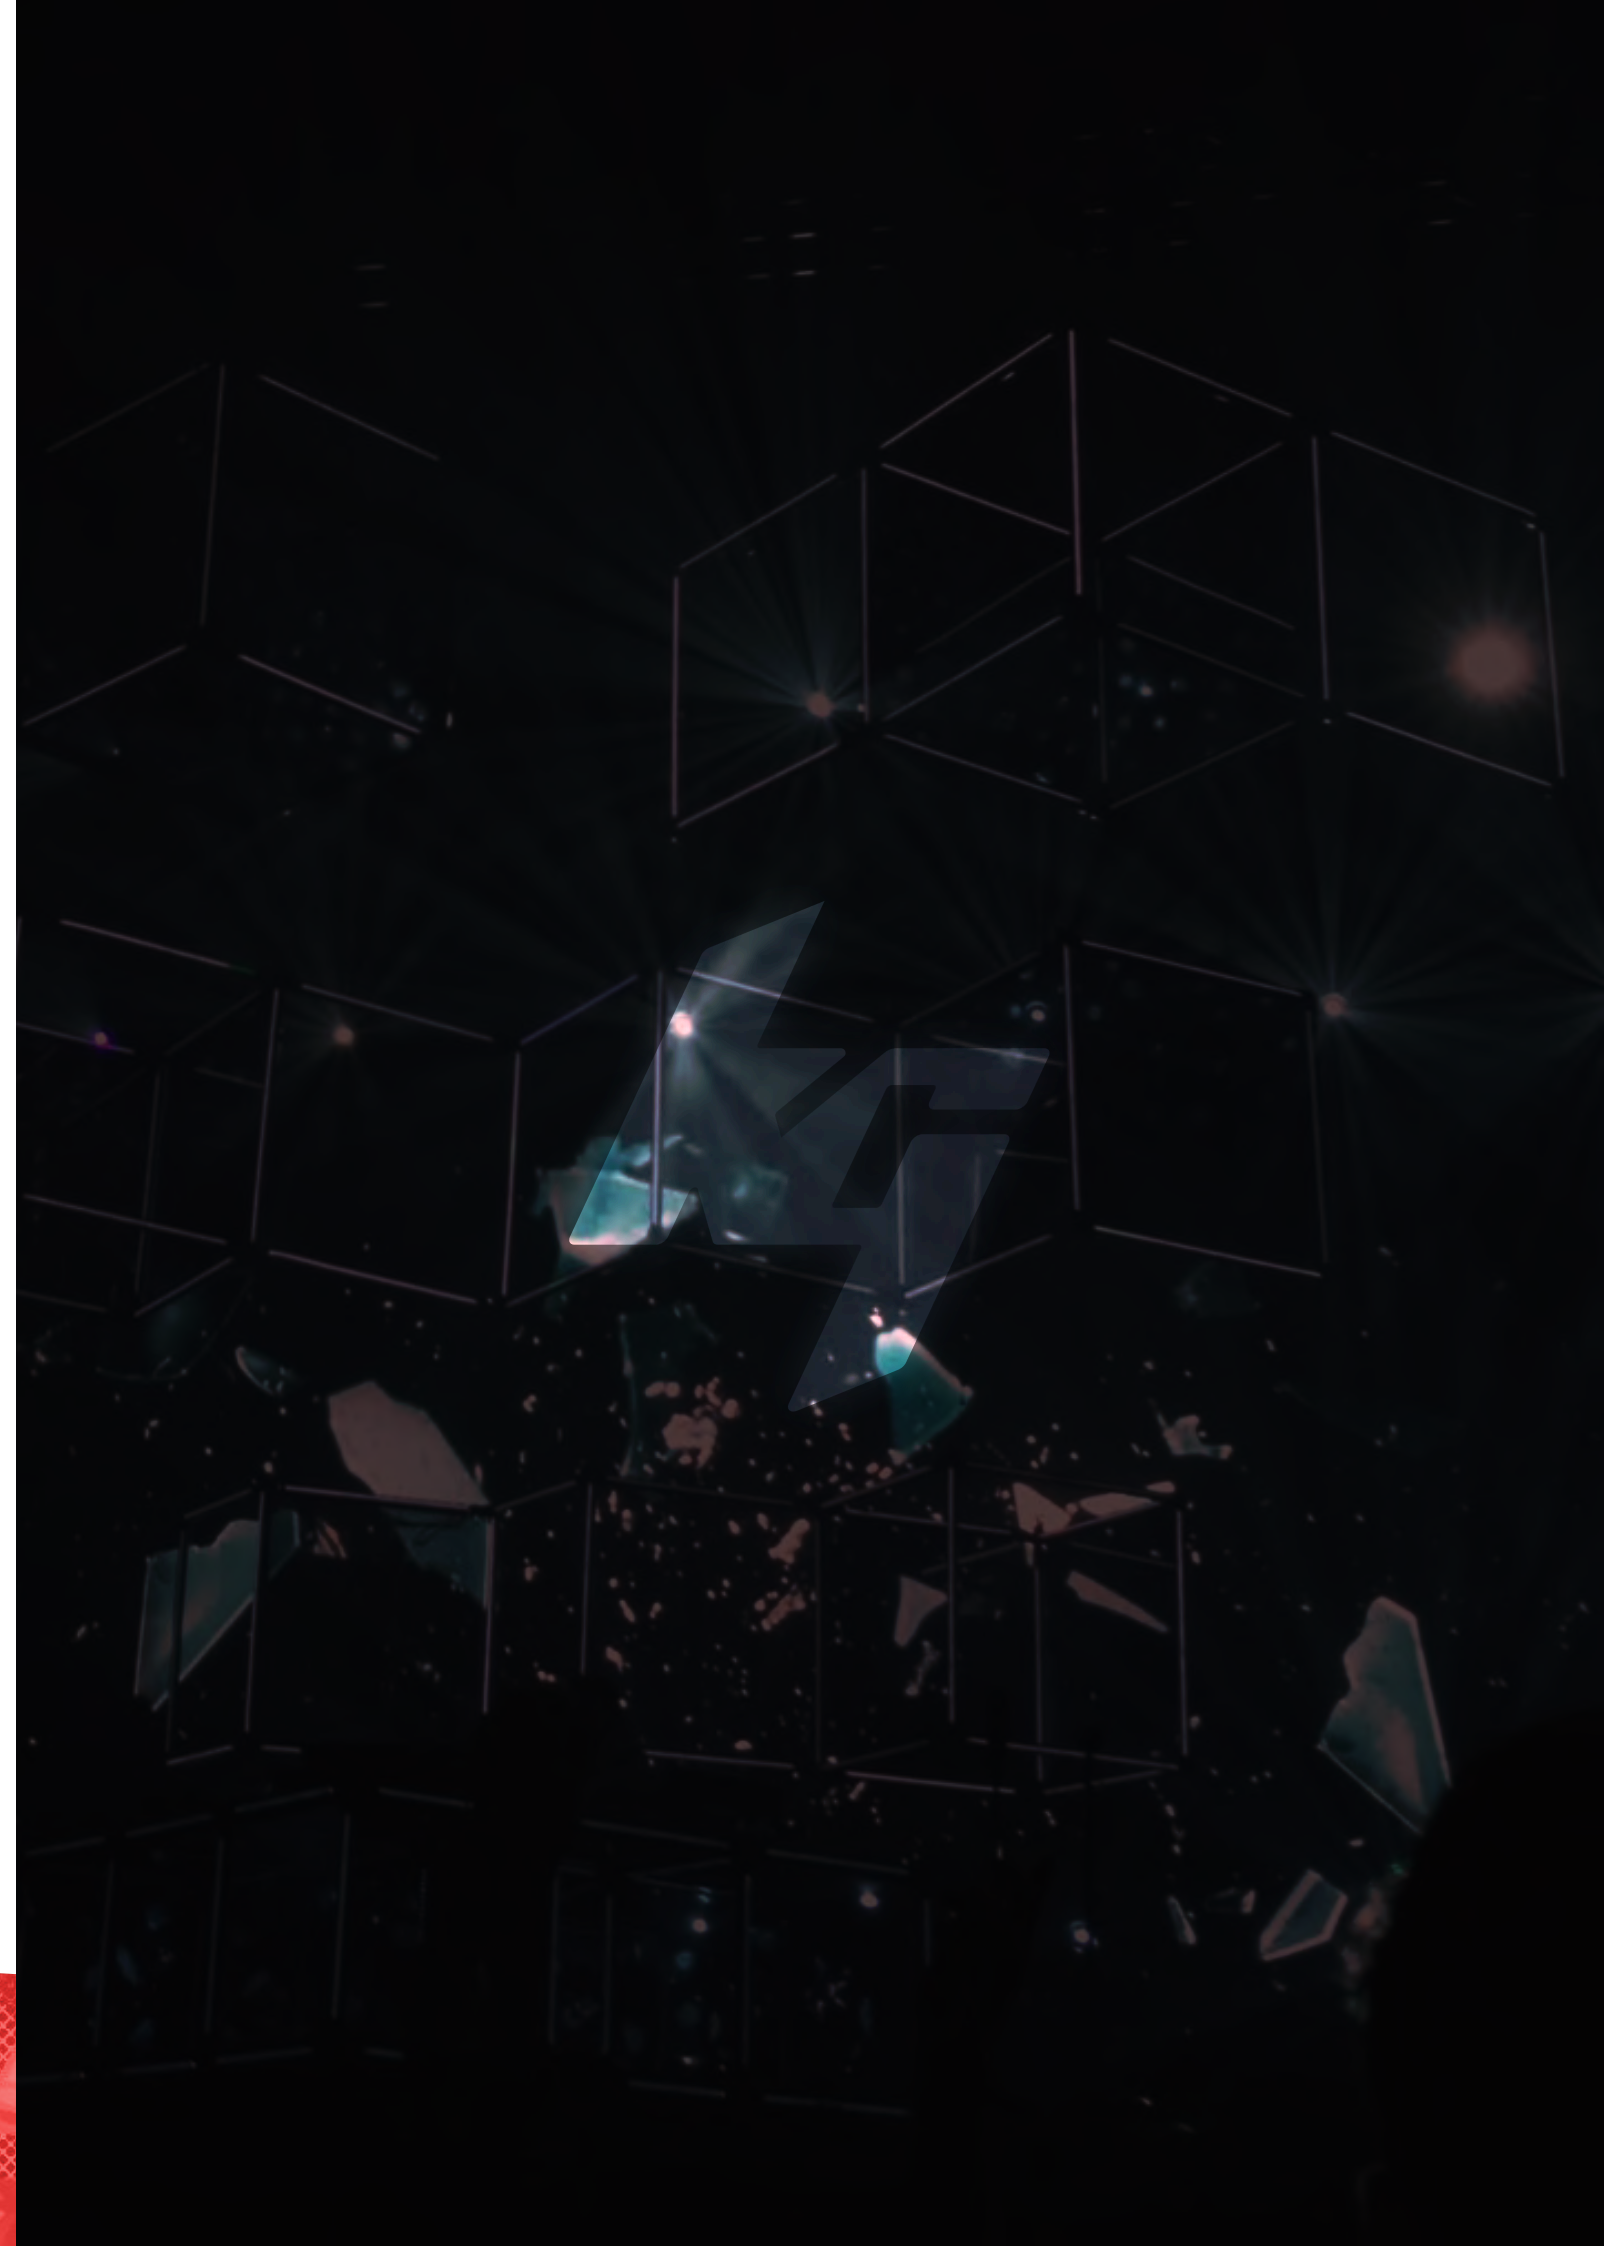

Obviously having that amount of holders becomes beneficial once options arise that benefit the creation of demand. Think of it like a tollgate. If a tollgate on a busy highway would start setting any currency as mandatory way of payment the immediate effect would be that demand for that currency would rise.

In the case of Kilo we have developed several ways to build demand along the way. And one of those ways is the creation of an asset backed stablecoin.

First of all we will make the stablecoin only tradeable against Kilos. This means that everyone who wants to purchase and hold our Stablecoin will need to use Kilo as means to get the stablecoin.

Within the stablecoin we have assets like Real Estate, Gold and other valuable precious metals and NFTs. All assets generate income like rent, royalties and loans. We will use this income to purchase Kilo on the open market and use those Kilos to purchase either more stablecoins or assets to add to our stablecoin hence creating even more income for and from the ecosystem.

The Stablecoin will be listed on select exchanges in the beginning but will be listed on more and more exchanges over time. We choose to start small since our assets haven't reached a peak point yet. The stablecoin isn't backed by 1trillion USD countervalue yet.

ROADMAP

PHASE 1: WASTE MANAGEMENT BUSINESS

- Design first batch of Kryptogangster NFTs
- Start of our social media channels (IG, TG, FB, Twitter, Discord)

PHASE 2: SHAKEDOWN

- Start Kilo Private Pre-Sale
- Start Kryptogangsters NFT Sale
- Bribe Law enforcement

PHASE 3: INITIATION

- Finalise website
- Finish Whitepaper
- Finalise 10k Limited Edition Kryptogangsters

START

PHASE 4: COSA NOSTRA

- Mint 10k Limited Edition
- Announce further plans

PHASE 5: BUILD EMPIRE

- Launch Kilo on CEX
- Start developing Stablecoin

PHASE 6: TAKE OVER

- Roll out next set of Limited NFT Batch
- Set up Crypto Ecosystem

PHASE 7: PLEAD INNOCENT

- Finalise NFT Gamification Development
